Maximum Time: 1 hr

Course Code: 15BINHS432

Maximum Marks : 20

After Completion of the course, the students would be able to

- CO1: Demonstrate a basic understanding of different perspectives and concepts of psychology
CO2: Apply the concepts of psychology in daily life
CO3: Examine the different theoretical perspectives and models of psychology
CO4: Develop solutions for problems related to psychology using appropriate tools/models

Note: Attempt all questions

- Que1. Gestalt principles illustrate that the brain seeks order, structure, and simplicity. [CO1
Based on the statement explain the various Gestalt principles using diagrams. (Understanding),
5marks]
- Que2. A preschool student watches his classmate hit another student. He then sees a [CO2
school teacher come over and reprimand the classmate for his actions. The (Apply), 5marks]
student seeing this scenario learns that he should not hit others and will avoid
doing so in future. On the basis of given scenario identify the various steps that
are important for social learning to take place. Identify two real life examples of
social learning.
- Que3. Compare and contrast Behaviouristic with Humanistic perspective in Psychology. [CO3
(Analysing),
5marks]
- Que4. Online teaching and learning have both its pros and cons. Despite many [CO4
advantages it has been found that some students take undue advantage of online (Creating), 5marks]
classes and end up with procrastination, lower understanding and poor grades.
Develop a solution based on operant conditioning to curb the negative behaviour
of such students.
